NOISE

E 870

Editorial	I. Mojzes	1
In memoriam Prof. András Ambrózy	K. Tarnay	2
Low-frequency noise measurements as a diagnostic tool in the semiconductor technology	P. Gottwald	3
1/f noise measurements as a characterization and testing technique in solid-state devices	Z. Çelik-Buttler, A. Jahanzeb, W. He and R. Zhang	11
Reliability prediction of digital integrated circuits	Zs. Kincses and P. Bánlaki	17
Conductance noise and percolation in high T_c superconductors	L. B. Kiss, P. Svedlinth, M. Björnander, P. Nordblad, F. Masszi and J. Magnusson	20
The influence on the noise of trimming cut-path in thick film resistors	G. Papp, Zs. Kincses and I. Hajdú	25
Contact noise measurement of metal-GaAs multispot test patterns	I. Mojzes, B. Kovács and Zs. Kincses	28
1/f phonon number fluctuation in pure liquids	G. Borbély	32
Extraction of noise sources in BJTS and HBTS	A. D. van Rheenen, L. R. Chaar and A. Young	36
